# Our success factors

## 我们的成功因素

Development, Production & Sales  
开发、生产与销售

完整系列的电机、风机和空气处理机组主要在德国洛森集团自己的生产基地生产。从有关组装的技术咨询到电线连接完毕且准备好下一步连接的空气处理机组，**德国洛森集团将会向客户提供直接服务。**

**我们的节能EC电机式专为位于我们Künzelsau总部的现代化生产线而开发和制造的。**

通过知识和创新生产技术的结合，我们实现了可满足最高需求的质量要求。

通过生态设计指令2009/125/EC (ErP)的引入，我们的使用能源的产品可满足最低能效要求。

自2013年起，配有EC电机的风机目前已经实现了100%极限值。

The complete range of motors, fans and air handling units is mainly manufactured at the Rosenberg Group's own production sites. From technical advice via assembly to delivery of air handling units that are wired ready for connection, the customer receives **all services first-hand from the Rosenberg Group.**

**Our energy-saving EC motors are developed and manufactured exclusively on our modern production line at our Künzelsau headquarters.**

By a combination of know-how and innovative production technology we achieve a quality that can cope with the highest demands.

With the introduction of **Ecodesign Directive 2009/125/EC (ErP)**, compliance with minimum energy efficiency requirements for Energy-using Products is required.

**Rosenberg fans with EC motors currently already fulfil 100% of the limit values valid from 2013.**

## **Complete solutions at first hand** **完整的直接解决方案**

We combine many years of experience, innovative development and state-of-the-art production techniques.  
我们结合了多年经验、创新开发以及国家最先进的生产技术。

# Leading the way! 一路领先!

Energy efficient EC technology  
高效节能的EC技术

作为一个具有高瞻远瞩的公司，我们很久以前就确定了能源的合理使用具有至关重要的**生态和经济意义**—特别是在二氧化碳排放和能源价格上涨方面。

As a forward-thinking company, we identified a long time ago that a sensible processing of energy is of crucial **ecological and economic significance** – particularly with regard to CO<sub>2</sub> emissions and rising energy prices.

Therefore our engineers and technicians are constantly working to improve the energy efficiency of our products – and with success: Our motors with modern EC technology are more than 90% efficient and **save up to 50% in energy** as opposed to conventional motor technology. The low energy consumption not only contributes towards protecting the environment but at the same time also reduces our customers' operating costs.

由此，我们的工程师和技术人员正在一起不断努力地改善我们产品的能源使用效率-并获得了以下成功：与采用了传统电机技术的电机相比，我们的采用了现代EC技术的电机具有超过90%效率的性能并可**节省高达50%的能源**。低能耗不仅有助于实现环境保护也同时还可降低了客户的运营成本。

EC技术不仅仅是“节能奇迹”。EC电机具有免维护和无声的特点。通过**集成智能控制器**，可实现连续控制和其他附加功能如压力、流速和空气质量的控制。我们的EC产品可满足有关能源效率、成本效益和较高空气质量方面的**最严格要求**。

EC technology is much more than an "energy efficient wonder". EC motors are maintenance free and silent. The **integrated, intelligent controller** allows a continuous control and further additional functions like pressure, volume flow, or air quality control. Our EC products **fulfil the strictest requirements** when it comes to energy efficiency, cost effectiveness and high air quality.

### EC技术的优点

- 效率非常高
- 采用了集成控制器  
(实现连续控制)
- 连接非常简单
- 附加功能 (如压力  
控制等)
- 具有相同性能等级  
电机的尺寸更小
- 更低的功耗

### Advantages of EC technology

- very high degree of efficiency
- integrated controller  
(continuous control)
- very simple connection
- additional functions (pressure  
control, etc.)
- smaller-sized motor for the  
same level of performance
- less power consumption

## Fascinatingly efficient 更高效

EC technology preserves the environment and reduces costs at the same time.

# Functional Principle 功能原理

Energy efficient EC motor technology  
高效节能的EC电机技术

**Rosenberg EC** 电机 (EC=电子整流) 是无刷、直流和外转子型电机。

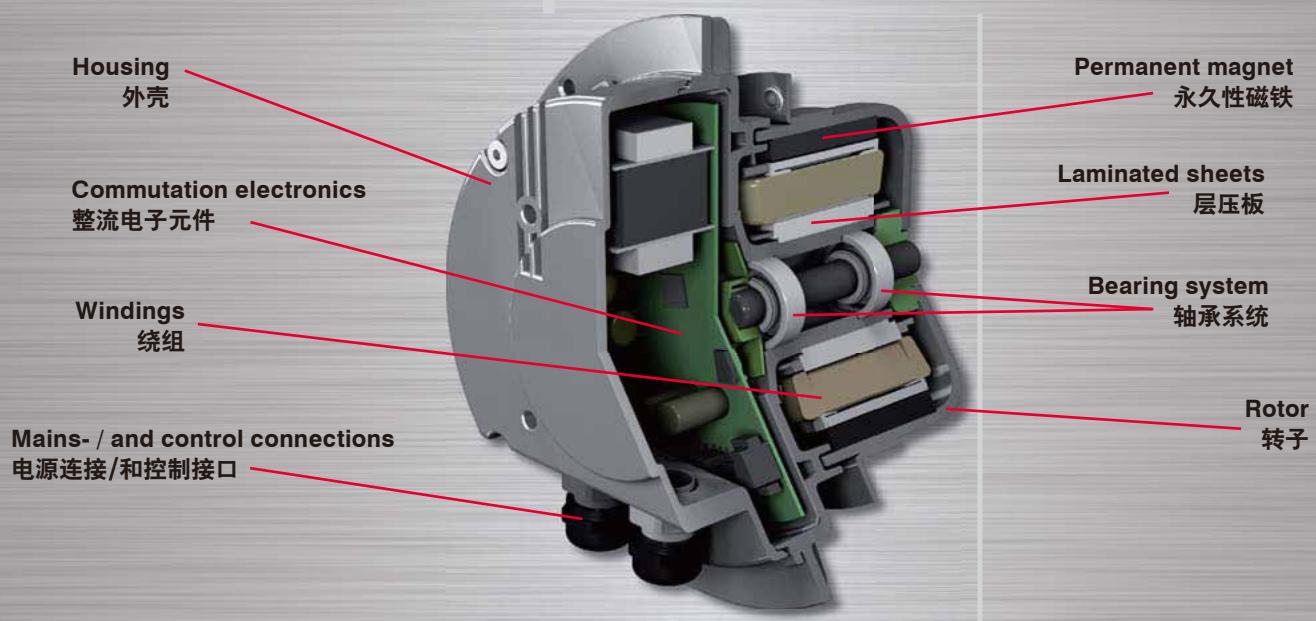

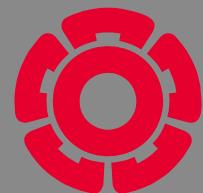

在整流电子设备中，交流电压将通过整流器转变为直流电压。电机位置取决于逆变器模块所提供的电压（类似于变频器原理）。EC整流电子设备不同于变频器，前者是根据位置、转向和默认状态来决定定子中的电机相位如何供给电流（整流）。转子中的永久磁铁将产生一个满负荷生产所需的磁场。因此可确保对高效、低噪音和连续电机转速的控制。而转子上的凸缘组件将用于叶轮的装配。

根据不同的电机类型，接线盒上将配有电缆连接螺钉或连接电缆，以确保方便快捷的连接。

A **Rosenberg EC** motor (EC = electronically commutated) is a brushless, direct current, external rotor type of motor.

In commutation electronics, an AC voltage is changed into a direct voltage by a commutator. The motor position is dependent upon voltage supplied via an inverter module (similar to the principle of a frequency inverter). The EC commutation electronics are different from a frequency inverter in that they decide how the motor phases in the stator are supplied with current (commutation) depending on position, rotation direction and default. Permanent magnets in the rotor produce a magnetic field which is required for full load production. A high efficiency, low noise, and continuous motor speed control is possible with this. An assembly flange on the rotor is used for impeller assembly.

Depending on the motor type, a terminal box is available with cable screw connections or connection cable for easy and quick connection.

根据不同的应用领域，可采用另外的控制功能（如，恒压控制、体积流量控制、以及温度控制等）。

传统的直流电机配有一个外壳，里面装有所有的装配组如碳刷、集电器、轴承、以及带有绕组的电枢等。它们被合理布置好。采用了EC电机组件，将会节省更多的空间且不再需要集电器和碳刷了。因此，电机尺寸将大大减少，从而具有了安装尺寸和静音运行的优势。

相对于传统电机，能耗和安装成本更低（无需变压器控制装置、变频器、或相位角控制装置），因此虽然EC风机的投资成本稍高，但很快会在最短的操作时间内被分摊掉。潜在节能的例子可见第16/17页。

Depending on the application area is possible to adopt further control functions (e.g. constant pressure control, volume flow control, temperature control).

Conventional DC motors have a housing which contains all the assembly groups like carbon brushes, the collector, bearing, armature with winding , etc. They are arranged one after another. With the EC motor assembly, more space is saved and a collector and carbon brush are not necessary. Therefore the motor is significantly shorter and consequently has advantages with regard to dimensions when installing and quiet operation.

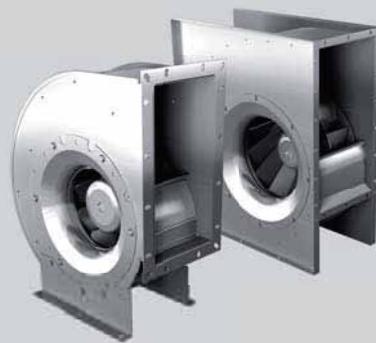

The slightly higher investment costs for EC fans in comparison with conventional motors are mostly amortized within the shortest operation time because of the low energy consumption and lower installation costs (no transformer control, frequency inverter, or phased angle control is necessary). Examples of potential savings can be found on pages 16/17.

# EC Centrifugal fans

## EC 离心风机

with backward curved impellers  
配有后弯叶轮

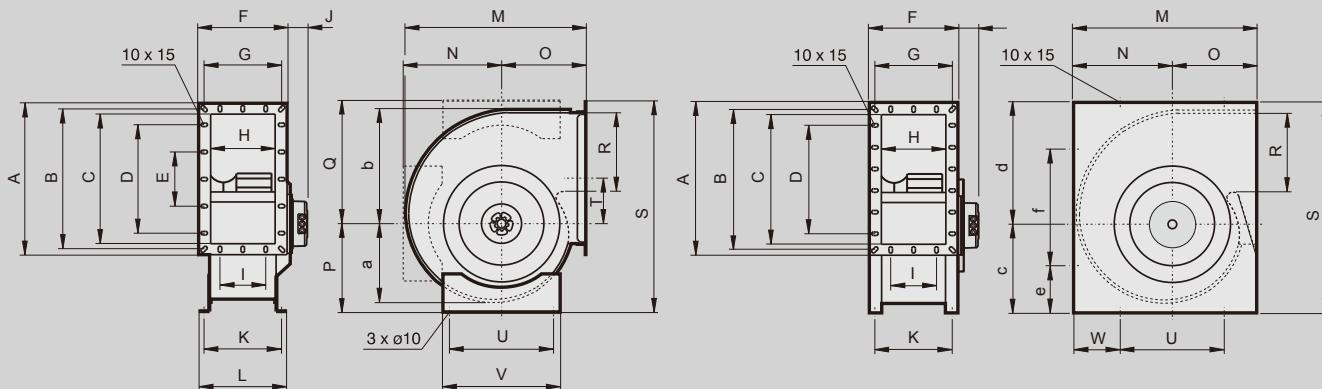

### 功能和设计

配备了后弯叶轮的高效离心风机是专为现代通风装置和空调机组而设计的，并适合携带含有不太太多灰尘、较少腐蚀性气体和蒸汽的空气。

尺寸满足标准R20范围和DIN323要求。尺寸应与叶轮直径相对应。外壳采用镀锌钢板制成，且外壳侧部将通过立边咬合连接到一个螺旋式挡板上。在侧面上有几个钻孔，用于固定支脚。这些支脚可自由旋转90度。对于大于450尺寸的机器，则需要配备矩形外壳。由于可通过一个报警继电器对集成电机进行保护，因此不再需要单独的电机保护装置了。在“控制操作”（标准）设计中，可通过一个0-10V信号或电位器（配件）来提供持续的电机转速。

## EC 管道风机

with backward curved impellers,  
swing-out  
带有摆动式后弯叶轮

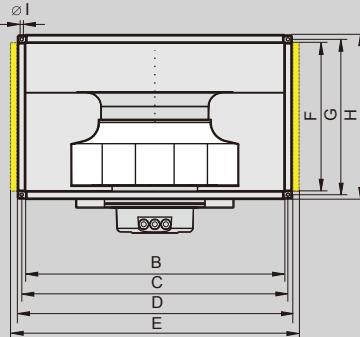

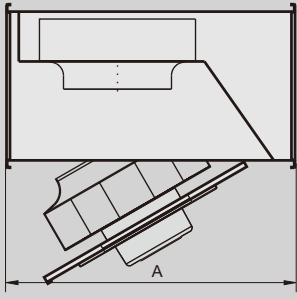

### 功能和设计

Rosenberg 管道风机集轴流风机 – 直流和易组装 – 高压稳定性、低噪音等级、以及离心风机高效等优点于一体的特点。

尺寸应与叶轮直径相匹配。外壳采用了镀锌钢板制成，且其外形为矩形管道，因此可直接安装到风道的任何位置处。此外，电机轮组件可整个地外摆出来，以方便清洁。由于在连接点处包覆有紧凑型吸音板，因此声音衰减范围（WS）可提供非常低的噪音值。可通过报警继电器对集成电机进行保护。在“控制操作”（标准）模式中，可通过一个0-10V信号或电位器（配件）来持续提供电机的转速。

# EC Roof fans

## EC 屋顶风机

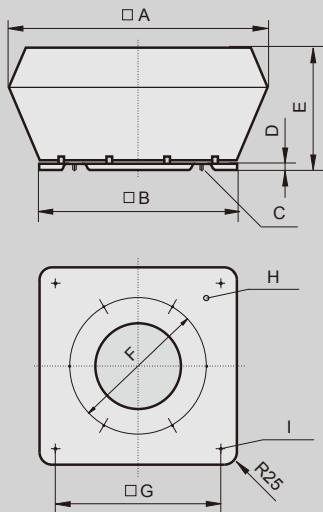

with backward curved impellers  
功能和设计

### 功能和设计

尺寸为310-450的机器配有一个防风雨的塑料叶轮，材料为PA6（聚酰胺）；尺寸为500-630的机器配有一个防海水侵蚀的铝合金叶轮。由于两侧配有一个加入了长期润滑剂的免维护球轴承，因此确保了较长的使用寿命。基架带有螺纹螺栓，用于紧固吸入侧配件和镀锌钢板制成的可伸缩喷嘴。防雨罩和方形外壳采用了耐海水侵蚀的铝合金材料。电机笼配有一个带有塑料涂层圆钢制成的集成防震装置。预装配设备的开关的电气连接将取决于单相或三相设计。由于报警继电器可对集成电机进行保护，因此不再需要单独的电机保护装置了。在“控制操作”（标准）模式下，可通过0-10V信号或电位器（配件）来持续提供电机的转速。在“调节操作”（标准）模式下，可通过接线盒组件的电位计、电位计（配件）、或0-10V信号来连续提供压力设置点。预组装的压力传感器配有一个显示器，可提供（100Pa、300Pa、500Pa和1000Pa）的可调节压力测量范围。

### Dimensions: 尺寸图：

### Features and Designs

Sizes 310-450 have a weather proof plastic impeller made of PA6 (polyamide) and sizes 500-630 have an impeller made of sea water proof aluminium. Maintenance-free ball bearings enclosed on both sides with a long-term lubricant provide a long service life. Base frames with threaded bolts for tightening of suction side accessories and retracted injection nozzle made of galvanized sheet metal steel. Rain protective hood and square housing made of sea water proof aluminium. Motor cage with integrated shock-protection made of plastic coated round bar steel. Electrical connection is at the pre-assembled device's switch depending upon the design single-phase or three-phase. Integrated motor protection is indicated via an alarm relay so no separate motor protection device is needed. In the "Control Operation" (Standard) model motor speed is continuously provided by a 0-10V signal or a potentiometer (accessories). In the "Regulation Operating" (Standard) model, the pressure setpoint is continuously provided via a potentiometer provided for terminal box assembly, a potentiometer (accessories), or a 0-10V signal. The pre-assembled pressure sensor has a display with an adjustable pressure measurement range of (100Pa, 300Pa, 500Pa, 1000Pa).

# EC Unoboxes

with backward curved impellers  
带有后弯叶轮

## 功能和设计

Rosenberg Unoboxes是专为携带小型到中型空气流而设计的。典型的应用领域包括公寓、商场、超市、车间和车库的通风装置。

外壳由带有双倒棱塑料边缘的挤压铝材制成的支架和双层20mm厚的面板组成，其中面板采用了镀锌钢板材料且其绝缘层采用了不易燃、隔音和隔热玻璃棉毡材料。其中一个外壳壁处于打开状态。标称尺寸达到450的风机配有后弯塑料叶片和一个钢板制成的支撑板。对于尺寸大于500的风机，其高效叶轮应采用铝合金材料。可通过一个报警继电器来对集成电机提供保护。在“控制操作”（标准）模式下，可通过0-10V信号或电位器（配件）来提供持续的电机转速。

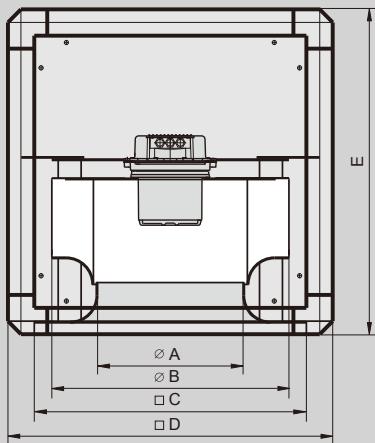

## Features and Designs

Rosenberg Unoboxes are designed for carrying small to medium-sized volume flows. Typical areas of application are, e.g. ventilation of apartments, shopping malls, supermarkets, workshops and garages.

The housing consists of a frame made of extruded aluminium profile with 2 chambers and plastic edges as well as double-skinned, 20mm thick panels made of galvanized steel sheet metal with insulation made up of non-combustible, sound- and heat-insulated glass wool mats. One housing wall is left open. Fans up to a nominal size of 450 are fitted with backwards-curved plastic blades and a support plate made of steel sheet metal. From size 500 onwards, the high-efficiency impellers are made of aluminium. Integrated motor protection is indicated via an alarm relay. In the model "Control Operation" (Standard), the motor speed is continuously provided via a 0-10V signal or a potentiometer (accessories).

# Total overview of our EC product range

## EC 产品系列总概述

Fans and AHU's with energy efficient EC drives  
配有高效EC驱动器的风机和AHU

For ventilation of residential, office and industrial buildings: For every application area we offer suitable EC solutions.  
对于住宅、写字楼及工业楼宇的通风：我们可为每个应用领域提供合适的EC解决方案。

- 配有后弯叶轮的离心风机
- **用于冷却的轴流风机**
- 配有后弯叶轮的管道风机，具有旋出和消声功能
- 可进行垂直吹除的屋顶风机
- **Unobox 消声排气箱**
- 空气幕
- 空气处理机组
- 带有热回收装置的紧凑型空气处理机组 (SupraBox)
- **Centrifugal fans**  
with backwards curved impellers
- **Axial fans for cooling**
- **Duct fans**  
with backwards curved impellers in swing-out and sound-attenuated designs
- **Roof fans**  
vertical blowing
- **Unobox**  
sound attenuated exhaust boxes
- **Air curtains**
- **Air Handling Units**
- **Compact Air Handling Unit with heat recovery (SupraBox)**

**EC 管道风机 (旋出型)**  
可安装在管道系统中，如商业和工业建筑楼的通风装置中。

**EC Duct fan (swing-out)**  
for installation in duct systems, i.e. ventilation of commercial and industrial buildings

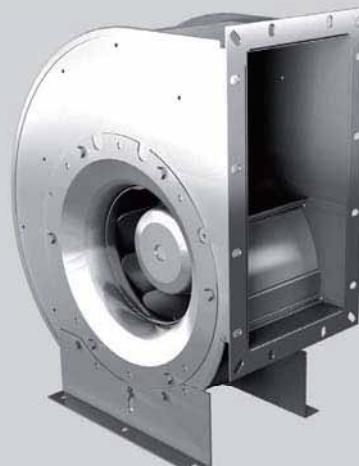

**SupraBox Comfort**

热回收系统，用于写字楼和商业建筑楼中的舒适性通风装置。

**SupraBox Comfort**

Heat recovery system for comfort ventilation in offices and commercial buildings

**EC 离心风机**

可安装在管道系统中，如商业和工业建筑楼的通风装置中。

**EC Centrifugal fan**

for installation in duct systems, i.e. ventilation of commercial and industrial buildings

**EC Air curtains**  
for industrial and commercial buildings  
**EC 空气幕**  
用于工业和商业建筑楼

**EC Unobox**  
用于住宅、商业和  
工业建筑楼的通风装置。

**EC 屋顶风机**  
用于住宅、商业和工业建筑楼  
的中央抽气系统。  
**EC Roof fan**  
for central air extraction of resi-  
dential, commercial and industrial  
buildings

**用于冷却的轴流风机 (EC)**  
用于冷却作用 (冷凝器和蒸发器)

**可自由运转的叶轮 (EC)**  
用在AHU和净化室技术中  
**Free running impeller (EC)**  
for use in AHU's and clean room  
technology
